Featured Product

Fighting mildew is a never-ending battle, especially in the humid regions around the world. The best cleaning solutions that we've tested failed to completely remove the mold and mildew stains even when a liberal amount of elbow grease was added.

We recently tried a new product called InstaGone Multi Purpose Stain Remover and we were shocked. Just 2 squirts on this grimy, mildew stained, vinyl-coated tent was all it took to make it look like new. Just spray on, wipe away the dirt, and rinse with water.
